

Improve attainment in core-curricular subjects through leadership

LEADERSHIP SKILLS PROGRAMME

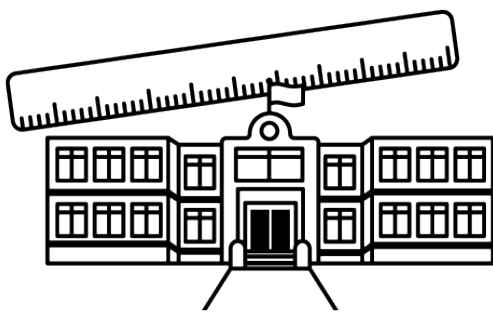

The Leadership Skills Programme is a groundbreaking programme that brings leadership into the classroom. Delivered using either Maths, English or Science, your students will learn and demonstrate leadership skills that will help themselves and others improve their attainment and engagement with core-curricular subjects.

Level 2 Qualification in Leadership Skills

Following extensive research with senior staff from schools and colleges across the UK, we have developed the Leadership Skills Programme to hone and develop vital leadership skills via practical learning using Maths, English or Science sessions as the demonstration of leadership element. The programme includes access to unlimited recognition awards for learners and the Level 2 Award in Leadership Skills qualification for up to 75 learners.

**For more information visit
the SLQ website: slqskills.org**

What do the leadership sessions involve?

The sessions use Maths, English & Science to lead fun and engaging leadership activities with younger students. Students will plan, lead and evaluate leadership sessions based on 18 downloadable activity cards, including:

- Maths: Measure how much surface area your school buildings cover, budget for a group meal, or construct a dodecahedron
- English: Presenting a news report on an important issue in your school, write and perform a spoken word piece with a positive theme or produce a healthy eating advert for young people
- Science: Make a cardboard skeleton, explain how the Earth's tilt gives rise to the seasons as it orbits the sun or explain how current flows around a circuit

Why have we introduced the qualification?

- Nearly 70% of Headteachers believed their school's academic attainment was raised due to delivering a leadership qualification
- Over 90% believed their students' confidence was raised through learning leadership skills
- Over 90% believed their students were more motivated to engage with other staff and students
- Over 75% of teachers agreed that a leadership qualification would benefit the attainment and employability of students aged 11-18
- 94% of leaders felt more employable after taking a leadership qualification

What does the Leadership Skills Programme look like?

Through a total of 15 hours, including 10 hours of tutored time, 4 hours of independent learning and 1 hour of demonstration of leadership, students will learn the leadership skills necessary to lead a fun and engaging Maths, English and/or Science session with younger students or peers. The qualification can be delivered in core curricular time, as an enrichment activity or extra curricular session.

What benefits does this qualification bring to your organisation and students?

The Leadership Skills Programme will:

- Prepare students to become more confident and self-assured
- Equip students with behaviours and attitudes they need for the next stage of their development
- Develop desired character traits and behaviours in students
- Support students' Social, Moral, Spiritual and Cultural development
- Support student progression against Progress 8 and Attainment 8 measures
- Improve student character traits in line with Ofsted requirements
- Increase academic attainment and engagement in core-curriculum subjects
- Provide an opportunity for peer-to-peer learning
